

Why an Octagon?

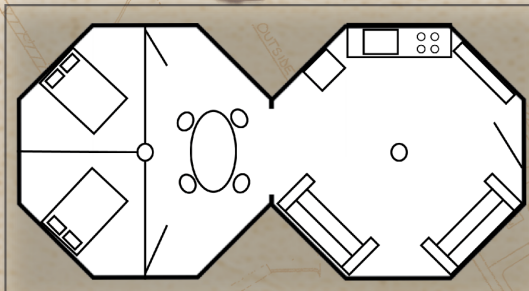

An octagon encloses
**20% more space than
a square!**

The Octagon Cabin:

- More natural light
- Easier to heat and cool
- Visually unique
- Provides more volume
- Fewer materials
- Less wind resistance

**Combine Two Kits
for more space!**

What are Structural Insulated Panels?

An SIP (structural insulated panel) is a very efficient building material comprised of a foam core glued between two strong wood panels.

This eliminates the need for stick framing and separate insulation.

**Building with
SIP panels
saves time.**

**Significant and real
Energy Savings
compared to stick
and other building
methods.**

**SIPs are
"Green"
Building
Products**

- Tough and Durable
- Air Tight envelope
- Low Waste
- Solid Surface
- Straighter Walls
- High R-Value

Two Sizes

- 330 sq ft
- or
- 740 sq ft

- Super Efficient
- Easy to Maintain
- Green Building
- Affordable

Engineered and manufactured in TX
exclusively for PrepCabin by an ENERGY
STAR partner and LEED certified facility.

**Expertly Engineered
and Manufactured in:**

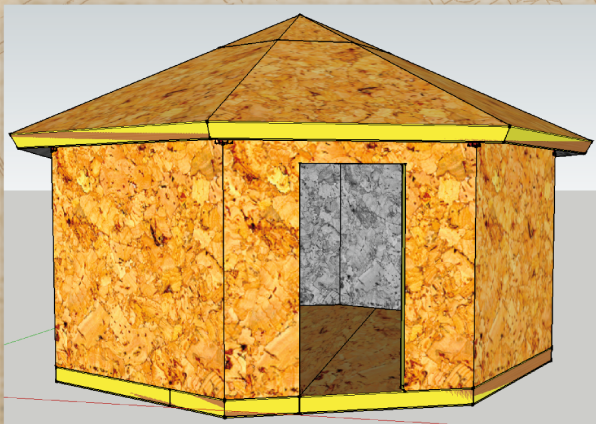

Less Framing, Less Labor!

Assembly of the PrepCabin Octagon Cabin Kit is straightforward and simple.

The panels arrive ready to assemble and are pre-insulated.

Arrange the panels in place on top of your foundation and secure them with included splines and screws.

With help from a few friends assemble a 20' kit in just 1 day.

Assembled kit before wall wrap or siding

Solid panel walls provide an excellent nail and screw base eliminating any searching for studs.
